Experience

Intern Backend Developer

Namco

12/2023 - Present

- Developed secure authentication and authorization systems using Node.js, reducing security incidents by 30% and protecting sensitive client data
- Optimized database queries and management in MongoDB, improving data retrieval speed by 40% and enhancing system performance

Projects

• Online Ubt: Online Ubt: Online Platform for Unified National Testing (UNT) in Kazakhstan (04/2024)

- Implemented robust user authentication protocols for the UNT platform, supporting 5,000+ concurrent users and ensuring secure access
- Designed and managed database schemas to streamline data handling, improving data processing efficiency by 25%

• WorldSkills Zhambyl:

(05/2024)

- Created a comprehensive website to promote AI-driven APIs, increasing potential client engagement by 50%
- Engineered complex database schemas to support various web functionalities, enhancing data organization and reducing query response times by 30%
- Developed PWAs with offline support and push notifications, increasing user retention by 35%

• CUTQ: Web Application for Haircut Appointment Scheduling (06/2024)

- Structured a MySQL database for user accounts, appointments, and service information, reducing data redundancy by 25%
- Automated booking updates via SMS and email, improving staff coordination by 60%
- Utilized Git and GitHub for effective project management, ensuring 100% code quality and collaboration efficiency

Education

Computer Science

Zhambyl Innovation High College

09/2022 - 06/2025

- Mobile Development: Experience in developing Flutter and Dart applications for Android with database integration and business logic implementation
- Web Development: Knowledge of HTML, CSS, JavaScript, and React for creating web applications. Experience integrating databases and developing functional web applications
- UI/UX Design: Proficiency in using Figma for designing mobile and web applications
- Graphic Design: Created logos, banners, and book designs using Adobe Photoshop and Illustrator

Skills

- JavaScript | MSSQL | Node | Express | Git | GoLang | SQL | HTML | CSS | Dart | Flutter | UI/UX Design | Figma | Graph Design
- Photoshop | Illustrator | Firebase | MongoDB | REST API | Python | Trello | Jira | Github | WEB | WEB App Development
- Frontend | Backend | Full-Stack | English, Turkish, Kazakh, Russian – All intermediate or basic level

Other

- **Silver Award:** Secured 2nd place in Web Development category at WorldSkills Jambyl Championship 2024 (05/2024)

• Udemy Course Certificates:

- *JavaScript Essentials: Mastered core JavaScript concepts, including fundamental language features and DOM manipulation* (03/2024)
- *Go (Golang) Programming: Studied essential Go programming concepts, including key language features and concurrency* (06/2024)

• Skillshare Certificate:

- *Basics of Python Programming: Completed a foundational Python course, covering key concepts such as syntax, variables, control structures, and basic data handling* (11/2023)

• Jira Certificate:

- *Jira Basics: Acquired fundamental skills in using Jira for project management, including issue tracking, project planning, and team collaboration* (11/2023)
